

WIMES Awareness Day

The awareness day will provide guidance on the use of WIMES and will include an exhibition.

There are approximately 70 WIMES specifications forming the de-facto water industry suite of standards for a wide range of products and processes. The majority include Data Sheets and many include WIMES LCC models. WIMES specifications are used by a wide range of Consultants, Contractors, Customers & Suppliers, each with their own expectations and challenges.

This awareness day will include presentations by the Pump Centre on the use of WIMES (including the Data Sheets & LCC models) and by representatives of WIMES users to talk about their experiences. Time for discussion will be included in each session and at the end of the agenda to address any questions or issues arising. The day will also include an exhibition of water industry related goods and services typically procured using WIMES specifications. A buffet lunch will be provided with time in the agenda to tour the exhibition.

29th OCTOBER 2015
